

Book Shop/Reviews

Todor Dimitrov

BookVue

General concept

The goal for the application that is called BookVue (comes from Book Review and buy) is an interactive site. There will be 2 main users and 1 maintainer/book manager – Readers and Authors. As the main user login in he can set himself as Reader or Writer. If he declare himself as a writer he will be able to publish books and as well as delete the book he has published. Both of the users are going to be able to write suggestions for either Authors or to discuss and share your opinion about books or Authors about a book or genre. Both of the users are going to be able to add to their list a book or just buy it.

Furthermore, there will be multiple options for both of the users. One of them are to be able to search, buy, read and get info about the books or publish or introduce new books.

Roles

The roles are 3 and simple

- Authors.
- Readers
- Book Manager that will be maintaining the site.

- **Authors**

1. They are going to be able to publish books

2. Buy books
3. Rate/Review other books
4. List and read books

- **Readers**

1. The readers are able to:
2. Buy books
3. Add to their list and read
4. Rate and review books.

- **Maintainers/Book Managers**

The admins are going to be able to keep track of the site and keeping the site users to follow the guidelines. And if a unappropriated book is posted the administrators are going to have the power to delete or ban these users.

Web application

In the web application Both of the main users - Readers and Authors are going to be able to search for books as well as adding them to their list or even buying them. In the web page the users are going to be able to login/register their user as reader which could be a student or a normal user. And Authors which will be able to publish their books. Both of the users are having the possibility to write suggestions as well as review books and rate them.

Windows application/Desktop application

In the desktop application the maintainers (administrators) are going to have the functionality of deleting blogs, published books. They would be able to add or

update the books to the shop after the Authors publish their books. As well as edit the status of the users and Authors as they can permit them posting publishing books. Also there will be a statistical overview of the books sold per month or year based on the information available from the Web Application

Wireframe:

BookVue Main page

The screenshot shows the main interface of the BookVue application. At the top, there is a navigation bar with three tabs: "Books" (highlighted in yellow), "About", and "Profile". To the right of the tabs is a circular "Logo" placeholder with the text "Adds or something" below it. Further right is a "Sign in/up" button with a user icon. Below the navigation bar is a search bar with the placeholder text "Type the title or the author of a book you like to read & we take care of the rest...". A large section titled "Popular subjects" follows, featuring six categories arranged in two rows of three: "Romance" (with a heart icon), "Adventure Stories" (with a person icon), "Fantasy Fiction" (with a dragon icon); "Manga" (with a manga icon), "Thrillers & Suspense" (with a lightning bolt icon), and "Time travel" (with a clock icon). At the bottom of the main content area is a footer bar with two buttons: "Socials" and "Contact us", both in yellow.

Books Page

The screenshot displays a user interface for a 'Books Page'. At the top, there is a navigation bar with three tabs: 'Books' (highlighted in yellow), 'About', and 'Profile'. To the right of the tabs is a circular 'Logo' placeholder. Further right is a user icon with the text 'Sign in/up'. Below the navigation bar, there are two book entries, each consisting of a small thumbnail image, a title, an author name, and two buttons: 'Info/Buy' and 'Add to List'. The first book entry has a single thumbnail, while the second has two stacked thumbnails. At the bottom of the page is a search bar with the placeholder text 'Search for another book'.

About page

The screenshot shows a web page titled "About page". At the top is a header bar with a search icon, three buttons labeled "Books", "About", and "Profile", a "Logo" placeholder, and a "Sign in/up" button with a user icon. The main content area features a large title "FAQs" and two questions with associated text boxes:

How to register?
Just use the top right icon and you will register after filling the right contents

I'm an author... How do I publish or list a book in your site?
First of all you have to register to be able to list or buy a book. Then you can start your own blog where you can publish about yourself. And in the future we will make that you can add or publish a book
